## Deployment method

## App connected to GitHub

Code diffs, manual and auto deploys are available for this app.

Connected to [Parth-Works/Telegram-Bot](#) by [Parth-Works](#)

Disconnect...

- Releases in the [activity feed](#) link to GitHub to view commit diffs
- Automatically deploys from `main`

## Automatic deploys

Enables a chosen branch to be automatically deployed to this app.

You can now change your main deploy branch from "master" to "main" for both manual and automatic deploys, please follow the instructions [here](#).

Automatic deploys from `main` are enabled

Every push to `main` will deploy a new version of this app. **Deploys happen automatically:** be sure that this branch in GitHub is always in a deployable state and any tests have passed before you push. [Learn more](#).

☐ Wait for CI to pass before deploy

Only enable this option if you have a Continuous Integration service configured on your repo.

Disable Automatic Deploys
